About

Versatile Software Engineer and Technical Support Specialist with 1.4 years of proven experience in the Healthcare IT sector. Skilled in full-stack development, client-side implementation, and end-to-end technical support, with expertise in HTML, CSS, Java, SQL, PostgreSQL, and JavaScript frameworks like ReactJS and Vite. Adept at customizing reports, troubleshooting complex issues, training end-users, and ensuring seamless product deployment.

Technical Skills

Development: HTML, CSS, Java, ReactJS, TailwindCSS, Bootstrap, JSON, and Sql

Version Control: Git, GitHub

Other Tools: JasperReports (I-Report), Unity, Blender, Figma, MS Office

Additional Skills: Technical Support, Client Training, Report Customization, Deployment & Implementation

Experience

Adroit Soft India Pvt. Ltd. [1 year 4 months]

October 2023 – Febraury 2025

Software Engineer

Chromepet, Chennai, India

- Developed and enhanced over 25 software features, performed thorough testing, and incorporated client-driven changes, leading to a 20% improvement in product usability and client feedback scores.
- Created and customized 100+ reports using I-Report based on user requirements, enabling better decision-making and data visibility for end-users.
- Led a team of 4 developers in implementing new features and managing version upgrades, successfully meeting 100% of deadlines across all projects.
- Provided technical support to over 50+ clients, resolving 95% of software-related issues within 24 hours, ensuring smooth functionality and high client satisfaction.
- Delivered hands-on training to 30+ new clients, improving onboarding efficiency by 40% and reducing initial support requests by 25%.
- Conducted 15+ product demonstrations for potential clients, contributing to the successful acquisition of 10+ new customers.
- Implemented software products across 20+ client environments, including server setup and configuration, reducing average implementation time by 30% through optimized deployment processes.
- Completed 4 full-cycle implementations independently, from server setup to end-user training, achieving zero post-implementation critical issues and positive client evaluations.

Projects

Portfolio Website

- Created a personal portfolio website using React, Vite, HTML, CSS, and JavaScript to showcase skills, experience, and projects.
- Implemented a JSON-driven structure for dynamic content updates without changing source code, ensuring easy scalability.
- Designed a clean, responsive UI with reusable components, optimized for both desktop and mobile viewing.

Edusity - College Landing Page

- Designed and developed a fully responsive landing page for Edusity, an online learning platform concept, using React, Vite, HTML, CSS, and JavaScript, ensuring fast load times and smooth user interactions.
- Built modular and reusable UI components in React, with content dynamically rendered using JSON, allowing for easy updates and scalability of course or platform data.
- Implemented modern web design principles focused on accessibility, responsiveness, and clean aesthetics, resulting in an intuitive user experience across desktop and mobile devices.

Education

Paavai Engineering College

Bachelor of Engineering in Computer Science and Engineering(CGPA of 7.39)
